How to Auto-Translate YouTube Videos

Watching videos in another language can be challenging, but YouTube makes it easier by offering automatic subtitle translation. This guide will show you, step by step, how to enable auto-translation of captions into English when watching NoDark's videos through our website or directly on YouTube. By following these steps, you can fully engage with our content regardless of the original language spoken in the video.

Step 1: Open the YouTube video on the NoDark website or directly on YouTube.

Step 2: On the video player, click the **CC (Closed Captions)** button to turn on subtitles.

Step 3: Next, click the **Settings** icon (the small gear at the bottom-right corner of the video).

Step 4: In the menu, select **Subtitles/CC**.

Step 5: Choose **Auto-translate** from the list of options.

Step 6: Scroll through the available languages and select **English**.

Step 7: The subtitles will now automatically appear in English while the video plays.

Tip: If subtitles are not showing, make sure the video has captions enabled by the uploader. Auto-translate works by translating existing captions, so if no captions are provided, the feature may not be available.
